

Dear FCC Representative,

I am deeply troubled concerning the fact that some organizations have applied for low power translators and are not local to the communities they intend to be licensed to.

As an example, "Hope Church of Marlton" (FFC ID# 122809) has applied for 69 CPs. The truth is this church is not truly local to areas like Vineland, NJ along with PA and DE).

What is particularly troubling is that this church is nothing more than an affiliate of Calvary Chapel, the organization that is in my opinion breaking the law with its applications for LPFM and translator licenses. The FCC has recently granted 20 translator CPs to this organization whose intention is to simply run a feed from its headquarters in California.

Please do not approve any more of these translator applications and if possible do not allow those approved to build to become licensed.

It's a tragedy that a church organization would commit an unethical act like this.

Thank you for your interest in this matter.

Sincerely, Joe Josh Burke, WZFI-LP FM
